

Cricket Player Performance Tracking Application :

CRICKSTATS

1. IDEATION

1.1 Problem Identification

Cricket players and coaches often find it difficult to maintain and analyze player performance manually. Important details such as runs, wickets, strike rate, economy, catches, and match history may be recorded in different places. This makes it difficult to track progress, identify strengths and weaknesses, and compare performances over time. Therefore, there is a need for a simple application that can store and analyze cricket performance data in one place.

1.2 Problem Statements

Cricketers and coaches need a simple application to **record, track, and analyze player performance**. Existing manual methods can be time-consuming and make it difficult to understand performance trends. **CRICKSTATS** aims to provide an easy platform for managing cricket statistics and improving player performance.

1.3 Target Users

- Cricket Players
- Coaches and Trainers
- Cricket Academies
- Team Managers
- Cricket Analysts

1.4 Empathy Map

Says

“I want to know my performance.”

Thinks

“How can I improve my batting/bowling?”

Says

“I need my match statistics.”

Thinks

“Am I improving compared to my previous matches?”

1.5 User Needs

- Easy performance recording
- Player statistics in one place
- Match-by-match performance history
- Batting and bowling statistics
- Performance comparison
- Simple graphs and reports
- Easy access to previous records

1.5 Pain Points

- Manual calculation of statistics
- Difficulty maintaining old records
- Time-consuming performance analysis
- No clear visualization of progress
- Difficulty identifying strengths and weaknesses
- Scattered performance information

1.6 Selected Idea

CRICKSTATS – Cricket Player Performance Tracking Application

CRICKSTATS is selected as the solution because it provides a **single platform to record, manage, track, and analyze cricket player performance**. It helps players and coaches understand performance through statistics, history, and simple reports.

1.7 Objective of the Idea

The main objective of **CRICKSTATS** is to develop a simple and user-friendly application for tracking and analyzing cricket player performance. The application aims to record batting, bowling, and fielding statistics, maintain match history, calculate important performance statistics, and provide easy-to-understand reports and graphs. It helps players and coaches monitor progress and identify areas that need improvement.

1.8 Expected Outcome

CRICKSTATS is expected to make cricket performance tracking easier, faster, and more organized. Players can view their match statistics, monitor their progress, and understand their strengths and weaknesses. Coaches can easily track player development and make better decisions based on performance data. Overall, the application is expected to reduce manual work and support continuous improvement in player performance.
